Subject: Question Regarding the Title Search on the Wilson Oil/Lorraine Refinery Site

Toeroek's preliminary research in assessor records located 14 parcel numbers to cover the areas specified on the Wilcox Oil & Gas Company Property/Ownership Review map received from you on Monday. In addition we located two additional parcels numbers associated with the railroad tracks that run through the site. We know EPA is interested in knowing whether there were transportation agreements in place between the railroad and site owners/operators. Did you also wish these two railroad parcels included in the title search report?

Please let us know so we can proceed with locating and contracting a local title company.

Thanks,
Louise
